

370 EDGETRACKER

UNLEASH YOUR INNER EXPLORER

The unique Edgetracker hull design was developed and perfected by Stessl and it has become a popular Australian tinnie known for its great handling and stability. The "Edge" pressing design coupled with the very wide beam gives the boat a smooth ride in flat and choppy water and there is plenty of room for all your fishing gear and equipment. The Stessl Edgetracker range includes cartopper & trailerable models. Solidly built with fully welded foam filled seats and 3mm rolled ribs the Edgetrackers will get you out on the water safely for years to come.
