

485 APACHE TILLER

UNLEASH YOUR INNER ANGLER

The popular Stessl Apache range of boats are now available in a broad range of models from 4.2m to 5.2m designed with fisherman in mind they are built to suit the variety of Australian waterways that we fish in. Deep sides combined with a beamy hull with a reverse chine hull means the Apache has a great ride and is stable at rest. We have focused on maximising the fishing space - plenty of internal volume with ample storage room in side pockets and under the casting deck, fully welded side decks to fit rod holders, a checker plate foredeck with an aluminium anchor well, all go towards providing an uncluttered fishing platform. There are an extensive range of options available to customise your Apache – please discuss your requirements with your local friendly dealership.
